

In 2023, Mrs Lisa Painter contacted Scalewatcher North America after seeing some information regarding iron/rust prevention from Scalewatcher. She mentioned that the iron/rust contents in the water were staining everything she owned. After some conversation, she purchased a 3 Star for her home.

Due to situations out of her control, she tried contacting plumbers to do the installation without any luck. She called the office for assistance with the installation. We walked and talked her through the installation, and she was proud of herself for being 71 and doing this herself!

Within a few weeks, she emailed us the testimony and the pictures of the water in the cups. The pictures show the difference, and we have repeatedly proven that Scalewatcher Works!

[A message from Mrs Painter for our website:](#)

This is for all the skeptics that isn't sure that it will remove rust or iron. Everyone I told what I was doing questioned my cognitive ability. Make sure you let everyone know if a 71 year old female can do it anyone can!

Thank You,

Lisa Painter
Florida
